

Your Beachbulldogge puppy is guaranteed as follows:

To be in good physical condition for the first 48 hours after delivery to the buyer. The buyer agrees to have the puppy examined by a licensed veterinarian within 48 hours of delivery for a complete physical examination. If the veterinarian finds the puppy to have a serious physical condition other than a viral or bacterial cold or viral infection (such as coccidia or giardia) which is easily treated the seller will replace the puppy with another puppy of equal or better quality when available from the same or upcoming litter after the first puppy is returned to the seller. The seller reserves the right to a second veterinarian's opinion at the cost of the seller. If the puppy is not examined within 48 hours of delivery time by a licensed veterinarian all guarantees listed are not valid. No monies will be refunded. Puppies are at risk for giardia and coccidia which is often brought on by the stress of shipping, a new home, new food, new people, change of climate or surroundings, etc. Another thing that may show up with shipping and/or the stress of moving and a new home is kennel cough (bordatella, a raspy cough may be a sign of this) which is common in dogs that are shipped and is usually caused by bacteria. Kennel cough is self-limiting and like the common cold must run its course. Full recovery is expected and kennel cough, coccidia or giardia on their own are not life threatening. All puppies are treated and vaccinated for giardia, bordatella and coccidiosis before they leave. However you need to be aware that these things can arise and are usually not serious and are easily treated. We will not cover the treatment for them.

To be free from any hereditary/genetic defects that cause death or serious impairment to the vital functions in the puppy until said puppy is of one year of age. Any problems associated with the puppies hips will not be covered until said puppy is at least 12 months old. Hips will then be covered until said puppy is 18 months old. If an inheritable defect is documented by a veterinarian and presented to the seller with sufficient supporting evidence the buyer will be entitled to a replacement puppy of the same sex, of comparable or better quality, when available from the same or upcoming litter. Buyer may pick the breeding/litter they want a pup out of, however the specific pup to be used as a replacement will be chosen by Beachbulldogges not by the buyer. No cash refunds given and we will not pay any vet bills.

Puppy will be current on wormings and shots and will have received vaccinations and wormings depending on age. No replacements will be given in cases of Parvo.

If your dog is used in any kind of illegal activity (ie dog fighting) or any extreme sports (ie weight pulling) or is mistreated, abused, malnourished, or not taken care of the guarantee is null and void.

It is understood that at the time of this sale this puppy is not considered to be of show quality or breeding quality, but is represented as its breed and is suited as pet quality only.

This does not cover what in the bulldog breed consider normal or out of our control (ie cherry eye, stenotic nares, loose hips.) We cannot guarantee that the dog will not contract mange. Mange is a multifactorial genetic disease that can be transmitted in a recessive manner. There is much dispute among experts as to the specific differing causes of mange including environment, stress and nutrition therefore we cannot guarantee against it. We are not geneticists and cannot predict genetic problems. Skin allergies and umbilical hernias are not covered. We do not breed dogs with undesirable conditions such as mange or bad hips, but we cannot guarantee that previous generations did not have these conditions in their lines; therefore we cannot guarantee that these conditions will not show up unbeknownst to us in future litters.
